Andrea Böhme

Web Developer

About Me

I am a German speaking Web Developer with experience in building web apps with JavaScript & Angular. My projects include responsive websites and business apps which can be found in my public portfolio.

Searching for career challenges I found a passion in programming as analytical thinking and problem-solving ability are part of my personal strengths.

I started my IT journey coding small websites at home and then decided to get professional training and build projects. I applied to the Developer Akademie where I gained complete and comprehensive knowledge in web development.

The IT branch as an expanding market provides constant learning possibilities and I am sure that my IT knowledge combined with my business administration background as well as language skills will open opportunities to contribute as a teammate and to grow as a professional.

I am looking forward to building on my experience and starting my career in IT in a junior developer position.

Main Stack:

- JavaScript
- TypeScript, Angular
- HTML, CSS, Bootstrap

Side Stack:

- Git, APIs (REST), Google Firebase, SCRUM

Skills

- **Building Applications with JavaScript & Angular:** I built landing-pages and several web apps as well as OOP-based Jump-and-Run-Games with the respective technologies.
- **Working in a Software-Team:** During learning coding, I did several group projects where I learnt how to develop a software project in a team.
- **High sense of responsibility:** I am used to taking responsibility and working diligently as I always did in my job as a business analyst and auditor.
- **Fast Learner:** I am open to learning new skills and proved over the last months that I can work diligently towards a goal and achieve it.

Professional Experience
